REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The art of record considered as a whole alone or in combination neither anticipates nor renders obvious, a method for processing a microelectronic substrate, comprising: disposing an electrolytic fluid adjacent to a conductive material having a first surface in a first plane and a recess in the first surface, the recess being bounded by a second surface in a second plane, the conductive material further having a corner between the first and second surfaces; removing at least part of the conductive material from the corner by positioning first and second electrodes to be spaced apart from the microelectronic substrate and in fluid communication with the electrolytic fluid, and coupling at least one of the electrodes to a source of electrical potential and passing electrical current from at least one electrode through the conductive material to the other electrode via the electrolytic fluid; and as the at least part of the conductive material is removed from the corner, attaching less electrical current to the corner to reduce a rate at which conductive material is removed from the corner, together in combination with the rest of the limitations set forth in the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J Grant whose telephone number is (703) 305-3315. The examiner can normally be reached on Mon-Fri 8:00-4:30.
